

What is the Small Business Assistance Program?

The SBAP offers **free, confidential, and non-regulatory** technical, environmental assistance to small businesses. Our goal is to help you better understand and meet environmental requirements that affect your business.

How Small is Small Business?

To be eligible for this environmental help, the business should be independently owned and operated and employ fewer than one hundred employees. Industries we frequently help include:

- Wood products manufacturers,
- Concrete batch plants,
- Printers,
- Auto body shops,
- Sawmills, and
- Drycleaners.

Typical Assistance Includes:

- Identifying environmental requirements,
- Permit applications,
- Record keeping aids,
- Emission inventories,
- Compliance guides,
- Emission calculations, and
- Cost effective compliance options.

What is the N.C. Division of Pollution Prevention and Environmental Assistance?

N.C. DPPEA provides free, non-regulatory technical assistance for organizations that want to **improve environmental performance** or need help with **non-compliance issues, process inefficiencies** or rising **environmental management costs**.

DPPEA Services

- On-site pollution prevention assessments leading to waste generation reductions, lower environmental management costs and long-term solutions for compliance problems.
- A nationally-recognized Web site (www.p2pays.org), with more than 30,000 printable technical documents and case studies, a waste exchange database (NC WasteTrader) and a recycling markets directory.
- Assistance developing and implementing environmental management systems.
- Assistance and recognition for organizations committed to improving environmental performance through the voluntary Environmental Stewardship Initiative. Make the commitment to become an environmental leader. Visit <http://www.p2pays.org/esi/> for details.

DPPEA Environmental Successes

- Eliminated need for a screen printer's air permit with chemical substitution.
- Identified and helped remove a lead source at a home appliance manufacturer.
- Worked with a municipality to identify and reduce mercury sources and use.
- Recent ESI participants reduced **air, water, solid & hazardous waste by 59,299 tons, water use by 815 million gallons and energy use by 5,985 MMBtu.**
