Issue Permit 04795T10			
CDS No. 378900017		Title V	

1. Purpose of Application:

The Permittee has requested that a MACT avoidance condition be placed in the permit.

Changes to the Title V permit include:

1. removal of small indirect fired tower burner units to the insignificant activities list;
2. calculation of the allowable PM emission rate for compliance with 2D .0503 based on a facility wide heat input of 25.6 million Btu per hour;
3. splitting 2.1 B. into 2.1 B. and 2.1 C. to address 2D .0515 and 2D .0503 sources separately;
4. renamed 2.1C. to 2.1 D.;
5. added at MACT avoidance condition under 2.2 A.1.

2. Application Chronology:

The application chronology is detailed on the attached IMPAQ Report.

3. Conclusions, Comments, and Recommendations:

The RCO and ARO recommend issuance of permit revision 04795T10.
